## **ACCUSCORE'S "SYSTEM"**

AccuScore is not a Pick Service. Think of it as an Advisor that can provide objective analysis of your picks. The Daily Line Report is there to show you when this Advisor has been good and when it has been not so good. The DLR information shows you how interesting patterns often emerge in each sport. While sample sizes are often too small to make these patterns statistically significant, our subscribers prefer to know how good AccuScore's advice has been given different lines, teams and match-ups. Here's the recommended AccuScore System:

1. **MAKE YOUR OWN PICKS ON THE UPCOMING GAMES:** For example, you might make 28 picks on an NFL weekend based on your own gut or current system.
2. **REVIEW ACCUSCORE'S LIVE BETTING PREDICTIONS:** You will likely find that 10 to 20 of the AccuScore betting predictions will match your own picks. Focus immediately on these picks. If there are disagreements review the AccuScore Game Forecast and Analysis and see if there are reasons for abandoning your own pick and going with AccuScore's predictions.
3. **REVIEW DAILY LINE REPORT:** Compare these 10 to 20 predictions against AccuScore's archive. The archive shows the betting prediction record sliced and diced in many ways (by team, by line, etc.).
4. **DISCUSS WITH THE COMMUNITY:** Trust us, there are some really bright people on our PRO Forums. These guys (sorry, very few women, if any) are not only experienced, but they care about the community's performance. They have their own systems and are experienced with AccuScore. You'll want their feedback and they'll want yours.

When 3 or 4 of the above are in consensus these are your picks. Maybe you put more action down on those picks that have total consensus, or maybe you go with a pick that only has 2 in agreement because you feel really strongly about it. ***Ultimately, AccuScore really isn't a system and it really doesn't have an overall record because each member becomes a professional handicapper where AccuScore is just 1 part of their unique system.***

## **NATIONAL BASKETBALL ASSOCIATION**

The '08-09 season has been solid. While the overall point spread prediction record is just 439-411 (51.6%), when the home team is favored by less than 3.5 points (line of -2.5 or higher) the record is stellar 238-183 (56.5%, +3670). Over/Under predictions have been hot and are up to 474-404 (54.0%, +2960) overall. AccuScore is over 71% picking game winners this season, up from 68% last year and the 68% that Vegas favorites have won. This improvement has resulted in Side Value delivering a +3276 return on just 48% overall accuracy and money line predictions are an even more spectacular +5263.

## **NCAA BASKETBALL**

The 2008-2009 Season has been very good with an overall point spread and over/under record of 3078-2760 (52.7%, +4200) AccuScore's point spread prediction record is 1529-1426 (51.7%) overall, but 165-138 (54.5%) when the home team is favored by 16+, 118-83 (59%) on neutral courts (perfect for March Madness Neutral court games), and 382-326 (54.0%, +2240) when the road team is favored by 0.5 to 11.5 points. Over/Unders are a tremendous 1549-1334 (53.7%, +8160) with positive returns across the board. There are 130 different Team Trends (point spread and over/under predictions) where the Simulation record is 60% accurate or higher.

## **NATIONAL HOCKEY LEAGUE**

The 2008-2009 Season started out poorly, but since December NHL predictions have been very profitable. Side Value predictions are now up to 502-476 (51.3%, +1016) this season, with +3669 since December 1.

## **MAJOR LEAGUE BASEBALL**

It was another tremendous MLB Season with Side Value predictions delivering +8332 Units for an overall ROI of over 250%.

## **NATIONAL FOOTBALL LEAGUE**

AccuScore predictions were stellar mid-week (Vegas betting line vs. Simulation line on Wed afternoon) with a record of 250-208 (54.2%, +2120). The record against the final posted line AccuScore is a solid 247-210 (54.0%, +1600) and after a shaky first 5 weeks, AccuScore point spread predictions were 86-68 (55.8%, +1120) since. Under the final posted lines when the simulation line is at least 2 points different than the betting line AccuScore went 149-118 (55.8%, +1920). AccuScore was 8-2-1 on over/unders in the playoffs. AccuScore is also first amongst ESPN Experts picking NFL Game Winners.

## **NCAA FOOTBALL**

The 2008 Season is over and was solidly predictable. When the simulation line is most different from the betting line accuracy is at its best. AccuScore point spread predictions against the final posted lines were 52-34 (60.5%) and over/under predictions were 55-42 (56.7%) when the simulation is at least 6 points different from the betting line. Against mid-week lines (Wednesday betting line vs. Wednesday simulation line) point spreads where the lines are 5 or more different are 90-60 (60%) and over/under predictions are 105-82 (56%). See archive below for all the details. AccuScore was superior to experts ranking first by a full 7 games picking game winners amongst CBS Sports experts.

**R = Betting Prediction Right      W = Betting Prediction Wrong      P/NP = Push or No Pick (Vegas Line = Simulation Line)**

**NOTE:** The Difference Categories refer to the absolute value difference of the Vegas Line vs. the Simulation Line. For example, if the Vegas Line was -24 and the Sim Line was -27 it would be a SIM PS DIFF vs. VEGAS: 3 to 3.5 above. Records above based on final posted sim and vegas lines.

To accommodate those focused on wagers made earlier in the week we have added the record based on predictions from mid-week (Wed ~8 pm EST) below. Both Vegas lines and simulation lines can change between Mid-Week and Final Posting.

## MAJOR LEAGUE BASEBALL 2008

### DETERMINING SIDE VALUE AND MONEY LINE PREDICTIONS

In the sample below NYY is favored and if you risk 130 you win 100 if NYY wins. If you bet on the underdog BOS you win 110 if you risk 100. To determine Side Value we translate the +110/-130 odds into a Vegas Win %. If Boston pays off 110 for every 100 you risk, we interpret that as Vegas saying for ever 110 losses, Boston wins 100 times for a 47.6% chance of winning. If NYY are expected to win 130 out of 230 games their winning % is 56.5%. You'll notice these two percentages add up to >100%. This is the Sportsbook's Vig. They want to get their cut no matter who wins. We adjust the winning percentages so they add up to 100%. BOS down to 45.7%, NYY to 54.3%. In this sample Boston is winning 48.2% of simulations while the Yankees are winning 51.8%. Because Boston's simulation winning % is higher than the Vegas Win % the Side Value Prediction is for Boston. Since the Yankees are winning more than 50% of simulations the Money Line prediction is NYY.

SAMPLE ODDS	VEGAS WIN% STEP 1	VEGAS WIN% STEP 2	SIM WIN %	COMPARISONS	PREDICTIONS
BOS +110	$\frac{100}{(110 + 100)} = 47.6\%$	$\frac{47.6\%}{(47.6\% + 56.5\%)} = 45.7\%$	BOS 48.2%	SIM WIN % > VEGAS WIN %	SIDE VALUE = BOS
NYY -130	$\frac{130}{(130 + 100)} = 56.5\%$	$\frac{56.5\%}{(47.6\% + 56.5\%)} = 54.3\%$	NYY 51.8%	SIM WIN % > 50%	MONEY LINE = NYY

These are records for Side Value and Money Line predictions based on a variety of splits.

SIM OU DIFF vs VEGAS: 6 or More	17	12	2	59%	380	17	10	4	63%	600	22	9	71%

**R = Betting Prediction Right      W = Betting Prediction Wrong      P/NP = Push or No Pick (Vegas Line = Simulation Line)**

**NOTE:** The Difference Categories refer to the absolute value difference of the Vegas Line vs. the Simulation Line.

For example, if the Vegas Line was -24 and the Sim Line was -27 it would be a SIM PS DIFF vs. VEGAS: 3 to 3.5 above, as would a game where the Vegas Line was +6 and the Sim Line was +3. The larger the differences the higher the Betting Prediction %. Differences of 2 to 5 roughly translate to 52-60% Betting Prediction percentages.
